## Life and Death

CHICAGO (U-I) — Most sea life undergoes quick death, and if that were not the case there would be scarcely room for swimming.

The shad, according to the Encyclopaedia Britannica, is reputed to lay from 30,000 to 100,000 eggs per year and an individual oyster can produce 55 million to 114 million eggs during its lifetime.

The Atlantic cod is said to lay as many as 9 million eggs annually and the American eel from 5 million to 20 million every year.
